SOME HINTS

Dear Folks!

We hope you got this diskette early enough to participate in the QUIZ (see self-mailer). But if it's later than August 1, 1983, don't hesitate to buy the program package, because it represents a treasury of creative artwork! Enjoy it and have fun!

Please make a backup copy before using it, but only for yourself - not for commercial purposes! If there is any problem in copying it with your standard copy program, don't give up. For your security we copied all the programs on the back side (and we selected certified double sided diskettes for that reason!). If you have to return a damaged diskette please send us 10 US\$ for replacement.

APPLE and IBM users may use paddles and hopefully run a color screen to get the maximum out of all animation.

CPM users will control the programs only from the keyboard. To enable you to use any of the different kinds of terminals used in the CPM world, we preferred to rewrite the whole screen rather than using tab and special control functions when refreshing.

All program parts are MENU driven. If you would like to jump a certain program section just type the system specific break code and the next partition will be loaded and executed. When you type RESET then you start up like when booting. On CPM diskette check textfile FEST.HLP.

And now Munich is waiting for YOU!
